# Disposable Non-Invasive EEG Sensor

## Rapid Identification

The 2nd - generation identification chip ensures the compatibility of the sensor

## Stable Connection

Each transparent PC plug's thickness tolerance can be controlled precisely within  $\pm 0.02$  mm.

## Durable Performance

Enhanced connector design with thickened copper for better elasticity and lifetime, reduced contact impedance.

## Quick Pوندuction

The unique tines designed on the electrode allow for quick penetration of the stratum corneum. Patented conductive gel with lower contact impedance.

## Waterproof Design

Protect connector from fluid effect, ensuring patient and equipment safety.

## Other Options

Disposable non-invasive EEG sensors with different technologies are available to meet diverse patient monitoring equipment demands in hospitals.
