

## Non-invasive continuous blood pressure sensor

Only accept OEM customization

Different from the traditional cuff non-invasive blood pressure NIBP measurement, Medlinket has developed a sensor that can continuously and non-invasively measure human blood pressure, which can not only measure quickly and continuously, but also provide a more comfortable and convenient measurement experience.

### Features of Medlinket's non-invasive continuous blood pressure sensor:

1. Thinner, softer and more comfortable;
2. Dual wavelength sensor;
3. There are three sizes of S, M and L to suit a wide range of patients.

Medlinket has been focusing on the research and development of medical sensors and cable assemblies since 2004, including blood oxygen sensors, temperature sensors, non-invasive blood pressure sensors, invasive blood pressure sensors, ECG electrodes, EEG sensors, vaginal electrodes, rectal electrodes, body surface Electrodes, impedance electrodes, etc., have been sold to more than 90 countries around the world, and the products have been approved for clinical use by well-known medical institutions.

Medlinket's non-invasive continuous blood pressure sensor only accepts OEM customization. If you need it, please feel free to contact us.
